

Kilimanjaro's famous but rarely visited Crater Camp is located at 5790M on Kibo's crater rim next to the Furtwangler glacier, a short walk from Uhuru Peak. It is one of the most spectacular places on earth. The Crater Camp is set in alien environment of soft sand and vertical glaciers with excellent views of the ice walls of the Furtwangler Glacier the Reusch Crater and ash pit.

Getting to the Crater Camp incurs considerable extra cost when compared to the more conventional treks on Kilimanjaro because of the extra work our porters have to undertake to carry food and camping equipment to such high altitude. A night at the Crater Camp can be added to any of our Kilimanjaro programmes, it will be the highlight of your ascent of the mountain.....and possibly you're entire life.

If you'd like to discuss adding a night at the Crater Camp to your Kilimanjaro climb please give me a call.
